Mr. Georg Kilian,
Care Stadisch Munzsammlung
Alte Akademie,
Maurburgstrasse, Munchen, Germany.

Dear Sir:

Will you kindly send me together with your bill, a cast of the Thasos coin in the Munich Cabinet, described by Imhoof-Blumer, in his Monnaies Græques, page 50 # 54, weight 1.81, and the symbol, a lighted torch. Will you kindly send at the same time, any other coins of Thasos with a kneeling Heracles.

I should also like casts of Corinthian staters, having a standing or drinking Pegasus. And if you note any staters having the same symbol behind the Athena head, occurring both with a standing Pegasus and muled with another die where the Pegasus is not standing, kindly include these.

Thanking you in advance, I am,

Very truly yours,

Secretary.
